

GAME - Team UPDATE - 2012-02-07

Robot Actions 

[G21]

Robots may extend one appendage up to 14 in. beyond a single edge of their frame perimeter at any time.

*Violation: Foul for exceeding size allotments; Technical-Foul for continuous or repeated violations.*

These appendages are intended for use in manipulating Basketballs and/or Bridges. A Robot may have multiple extension devices onboard, but only one may be deployed at a given time.

All portions of an appendage that are outside the Frame Perimeter must be contiguous with each other. Very brief violations of the contiguity requirement as a single appendage is being extended or retracted will not be penalized.

GAME 

The Game

The Answer affected by the change to Rule [G21] has been updated in the Q&A.

Eligibility and Inspection 

[T09]

The Bill of Materials Template is now available under *Section 5 - The Tournament* on the Competition Manual section of the *FIRST* Website .
